PERSONAL PROJECTS

PORTFOLIO [sucessfully launched with github page] (02/2023 - 02/2023)

- I recently completed a web development portfolio and hosted it using GitHub Pages. The portfolio showcases my skills, experience, and projects in the field of web development, including HTML, CSS, JavaScript, and jQuery. I used GitHub Desktop to make updates to the portfolio, including changing some of the content and adding new projects. This allowed me to easily manage my code and version control, ensuring that the portfolio remained up-to-date and error-free. By hosting my portfolio on GitHub Pages, I was able to make it publicly accessible and share it with potential employers and clients. This provided me with a professional online presence that showcased my work and demonstrated my commitment to the field of web development. Overall, this project helped me to refine my web development skills and gain valuable experience in using GitHub and GitHub Desktop for version control and project management.

BASIC CALCULATOR (02/2023 - Present)

- This project is a basic calculator with responsive web design, which allows users to perform simple arithmetic calculations on any device with an internet connection. The user interface is designed to be user-friendly and easy to navigate, with responsive elements that adjust to the screen size of the device. However, the scripting part of the project is currently pending, which will enable the calculator to perform the calculations and display the results in real-time. Once completed, this project will provide a valuable tool for anyone who needs to perform quick calculations on the go, without the need for a physical calculator

INTERESTS

I have a keen interest in working with problem-based tasks as they provide an opportunity to learn new processes quickly and effectively. I thrive on challenges and enjoy finding solutions to complex problems, utilizing my critical thinking and analytical skills. Working with problem-based tasks also enables me to enhance my ability to understand complex information and learn quickly, allowing me to apply my knowledge in a practical and efficient manner. Overall, I am highly motivated to work with problem-based tasks, as it allows me to continuously improve my skills and knowledge in a dynamic and fast-paced environment.
